Special 510(k) Summary of Safety and Effectiveness:
Line Extension to the Xia[®] Titanium Spinal System and Xia[®] Stainless Steel Spinal System

Proprietary Name: Xia[®] Titanium Spinal System and Xia[®] Stainless Steel
Spinal System

Common Name: Spinal Fixation Appliances

JUL 27 2006

Proposed Regulatory Class: Class III

Spinal Interlaminar Fixation Orthosis,
21 CFR 888.3050

Spinal Intervertebral Body Fixation Orthosis,
21 CFR 888.3060

Pedicle Screw Spinal System
21 CFR 888.3070(b)(1) and (b)(2)

Device Product Code: NKB, MNH, MNI, KWP, KWQ

Date Summary Prepared: June 29, 2006

Predicate Devices Stryker Spine Xia[®] Titanium Spine System
K060361, K013823, K002858, K022160.

K061854 pg 2 of 3

Stryker Spine Xia® Stainless Steel Spine System
K060361, K031090, K012870.

Description of Device Modification This 510(k) is intended to introduce an extension to the existing Xia® Titanium Spinal System and Xia® Stainless Steel Spinal System that includes long arm bone screws and hooks.

Intended Use The Xia® Spinal System is intended for anterior/anterolateral and posterior, noncervical pedicle and non-pedicle fixation for the following indications: degenerative disc disease (DDD) (defined as back pain of discogenic origin with degeneration of the disc confirmed by history and radiographic studies); spondylolisthesis; trauma (i.e., fracture or dislocation); spinal stenosis; curvatures (i.e., scoliosis, kyphosis, and/or lordosis); tumor; pseudoarthrosis; and failed previous fusion.

The 6 mm diameter rods from the DIAPASON™ Spinal System and OPUS™ Spinal System are intended to be used with the other components of the Xia® Titanium Spinal System. The Titanium Multi-Axial Cross Connectors are intended to be used with the other components of the Xia® Titanium Spinal System.

Summary of the Technological Characteristics Documentation is provided which demonstrates the new long arm bone screws and long arm hooks of the Stryker Spine Xia® Titanium Spinal System and Xia® Stainless Steel Spinal System to be substantially

K061854 P3 of 3

equivalent to its predicate devices in terms of its material, design, and indications for use. Engineering analysis to demonstrate compliance with FDA's Guidance for Spinal System 510(k)'s May 3, 2004 was completed for the Stryker Spinal Xia[®] Titanium Spinal System and Xia[®] Stainless Steel Spinal System Long Arm Bone Screws and Long Arm Hooks.

Re: K061854

Trade/Device Name: Xia® Titanium Spinal System &
Xia® Stainless Steel Spinal System
Regulation Number: 21 CFR 888.3070
Regulation Name: Pedicle screw spinal system
Regulatory Class: Class III
Product Code: NXB, MNH, MNI, KWP, KWQ
Dated: June 29, 2006
Received: June 30, 2006

Dear Ms. Voic:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration.

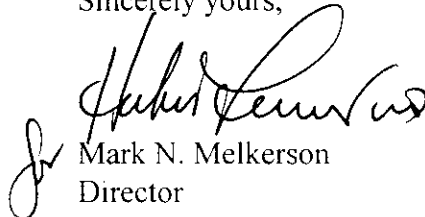

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to such additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act's requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); good manufacturing practice requirements as set

forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050. This letter will allow you to begin marketing your device as described in your Section 510(k) premarket notification. The FDA finding of substantial equivalence of your device to a legally marketed predicate device results in a classification for your device and thus, permits your device to proceed to the market.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please contact the Office of Compliance at (240) 276-0120. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21CFR Part 807.97). You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (240) 276-3150 or at its Internet address <http://www.fda.gov/cdrh/industry/support/index.html>.
